

STATE OF NEW MEXICO'S RULE 71.3 REPORT – FY 2020
EXHIBIT A: LOWER RIO GRANDE ADJUDICATION BUREAU

November 1, 2019

Pursuant to the requirements of NMRA Rule 1-071.3, the State of New Mexico presents its report setting out the State's priorities and available resources for the state stream system adjudication, in the Lower Rio Grande Adjudication Bureau for fiscal year 2020 (July 1, 2019 to June 30, 2020), which will be filed in each adjudication. The available resources are based upon full time employee ("FTE") time, including staff and contractors, and are listed in Table 1.

SUMMARY OF AVAILABLE RESOURCES FOR THE LOWER RIO GRANDE ADJUDICATION BUREAU

	FY2019 FTEs	FY2020 FTEs
Total Bureau Staff and Contractor Resources	11.80	13.35
A. Lower Rio Grande Adjudication	10.55	12.55
B. Gallinas River	1.25	.80

LOWER RIO GRANDE ADJUDICATION PRIORITIES FOR FY 2020

A. General

1. Litigation of proposed or designated stream system/expedited *inter se* issues

- a. Steam System Issue 104 (United States' interest in the Rio Grande Project). This stream system issue is currently stayed for continuing settlement discussions related to this and other litigation, looking for a comprehensive negotiated solution to issues raised by this steam system issue, by the lawsuit over the Rio Grande operating agreement, and by Texas v. New Mexico.
- b. Stream System Issue 107 (status of pre-Rio Grande Project surface water rights). This stream system issue is currently stayed along with, for the same reason, as Stream System Issue 104. There is one appeal from this stream system issue, arising out of the Court's striking of the purported Notice of Participation by dismissed claimant Scott Boyd. The appeal has been put on the Court of Appeals' general calendar, and numerous motions to stay the appeal by the appellant Boyd have been filed. The brief-in-chief has not been timely filed.
- c. The dismissal of the Pre-1906 Claimant's Expedited Inter Se is also on appeal. As with the Scott Boyd appeal appellants have sought to stay the appeal, based on their motion to intervene in Texas v. New Mexico. The current motion to stay will probably be denied, since a prior motion, on the same grounds, was denied, and briefing will begin.

- d. Stephen Faykus and the Faykus Family Trust subfile. This determination that the claimants lacked a surface water, river pumping right is on appeal and is fully briefed. There remain, however, pending activities in the district court related to the attempts of claimants to file a supersedeas bond to stay the subfile order on appeal—more specifically, an injunction against further river pumping issued by the Sierra County water judge.
 - e. Toby Romero subfile. This determination of forfeiture of a claimed water right from steam locomotive use was affirmed on appeal. The claimant has filed an application for a writ of certiorari with the Supreme Court, and that Court has requested that the State file a response no later than November 8.
 - f. Copper Flat Mine expedited *inter se*. This appeal of Mendenhall, forfeiture and abandonment issues arising out of water rights related to the Copper Flat mine has been fully briefed in the Court of Appeals by the main participating parties. Certain motions to file *amicus* briefs have not yet been acted on, nor has oral argument been set.
 - g. Rice/Packard subfiles. These two subfiles involve disputed claims regarding the amount of irrigated acreage for two new pecan groves. The State filed a motion for a scheduling conference in late July after the failure to settle in mediation.
 - h. Texas v. New Mexico. Though this is not subfile litigation, LRG Adjudication Bureau legal, support, and technical staff have been and will continue to be involved in support for discovery and trial preparation.
2. Negotiation with major parties.

None now pending other than the negotiations related to the Stream System Issue 104 stay.
 3. Mediation of other substantive issues.
 - a. Apodaca Cervantes. This is a challenge to a determination that evidence tendered of water use is insufficient to establish an FDR of greater than 4.5 acre-feet per acre per year.
 4. Other special procedures and procedural motions in the LRG
 - a. Continuing authentication of claims to historical groundwater use for claimants seeking to add groundwater component to their adjudicated and unadjudicated surface water rights, in conjunction with permitting applications to the District IV office.
 - b. Implementation of Stream System Issue 108, retroactive determination of EBID surface water amounts and places of use for subfiles entered before the settlement of Stream System Issue 101.
 - c. A motion to expand the scope of Implied Consent.
 - d. A motion to exclude certain smaller surface water livestock impoundments from the adjudication.

- B. Lower Rio Grande Adjudication, Routine subfile Processing
- a. The preparatory work for the creation of new subfile offers continues to be focused in the Northern Mesilla section, though work actively continues in all sections but Nutt-Hockett.
 - b. The continuing receipt of Hydrographic Survey Change Requests (HSCR) for all sub-basins prevents the hydrographic survey staff from working in one sub-basin exclusively. Of the three active sub-basins outside of Northern Mesilla, Southern Mesilla receives the most attention, because there the need to analyze a subfile following the receipt of a HSCR will typically require that the close-fitting block of subfiles adjacent to the newly-analyzed one must also be analyzed and, when appropriate, forwarded for new offers.
 - c. The status of all sections as of October 1, 2019, is:
 1. Nutt Hockett: 43 subfiles, 98% served, 98% adjudicated
 2. Rincon: 1237 subfiles, 96% served, 85% adjudicated
 3. Northern Mesilla: 5884 subfiles, 59% served, 39% adjudicated
 4. Southern Mesilla: 5491 subfiles, 59% served, 45% adjudicated
 5. Outlying Areas: 1358 subfiles, 83% served, 74% adjudicated
 - d. Routine subfile processing encompasses most of the bureau's everyday work, encompassing updating the Hydrographic Survey, creating new maps to conform to multiple point and polygon requirements, analyzing claims for a larger Farm Deliver Requirement, legal review of proposed offers, service of offers, revised offers or duplicates, reviewing objections, discussions with objecting claimants by survey or legal staff, default and implied consent requests, correcting entered orders with typographical errors and re-opening entered orders needing significant correction.

ANIMAS UNDERGROUND WATER BASIN ADJUDICATION PRIORITIES FOR FY 2020

1. J & C Victor Trust appealed a refusal by Judge Robinson to reconsider the basin-wide FDR set in a 2012. Its docketing statement was filed in April, 2019, and the case is currently waiting for a calendar assignment in the Court of Appeals.
2. As of October 1, 2019, there are 162 Animas subfiles, of which 87% have been served, and 61% have been adjudicated.
